

NATURAL PLAY

The creation of a natural play-trail within the area of woodland to the south of the Site can be led by / aligned with the 'community arts & heritage projects' identified in the Cuckoo Trail Masterplan (T3).

Any proposals should be informed by the Cuckoo Trail Masterplan principles, signage & wayfinding and materials & furniture strategies, as well as this report and the context of the Horam Station Hub surroundings.

It is recommended that access to the play trail connects to the south edge of the Hub space (see drawing 743_ 100) through gaps created on the existing fence-line, allowing it to be contained, safe and visible from seating areas within the main Hub space.

Visualisations an precedents are illustrative only
