

THE TERRACES AND HUB SPACE

Timber terraces are to be located on the grass slope adjacent to the access path allowing for informal seating and creating a more level space for flexible usable event / market spaces.

The area surrounding the Cuckoo Hub Kiosk adds to this flexible space, with picnic benches, cycle parking and new orientation signage providing a central community meeting space / visitor Hub. New trees are proposed to provide additional screening and help provide a vegetated backdrop to the hub space.

Further details can be found on Allen Scott drawings 743_353
